W16-P1: add w6 blogs data into index.html as blogs section

The screenshot shows the Visual Studio Code editor with two files open: `index.html` and `styles_42.scss`. The `index.html` file is on the left, and the `styles_42.scss` file is on the right. A red box highlights the new `<section class="blogs">` added to the `index.html` file, and another red box highlights the corresponding SCSS styles in `styles_42.scss`.

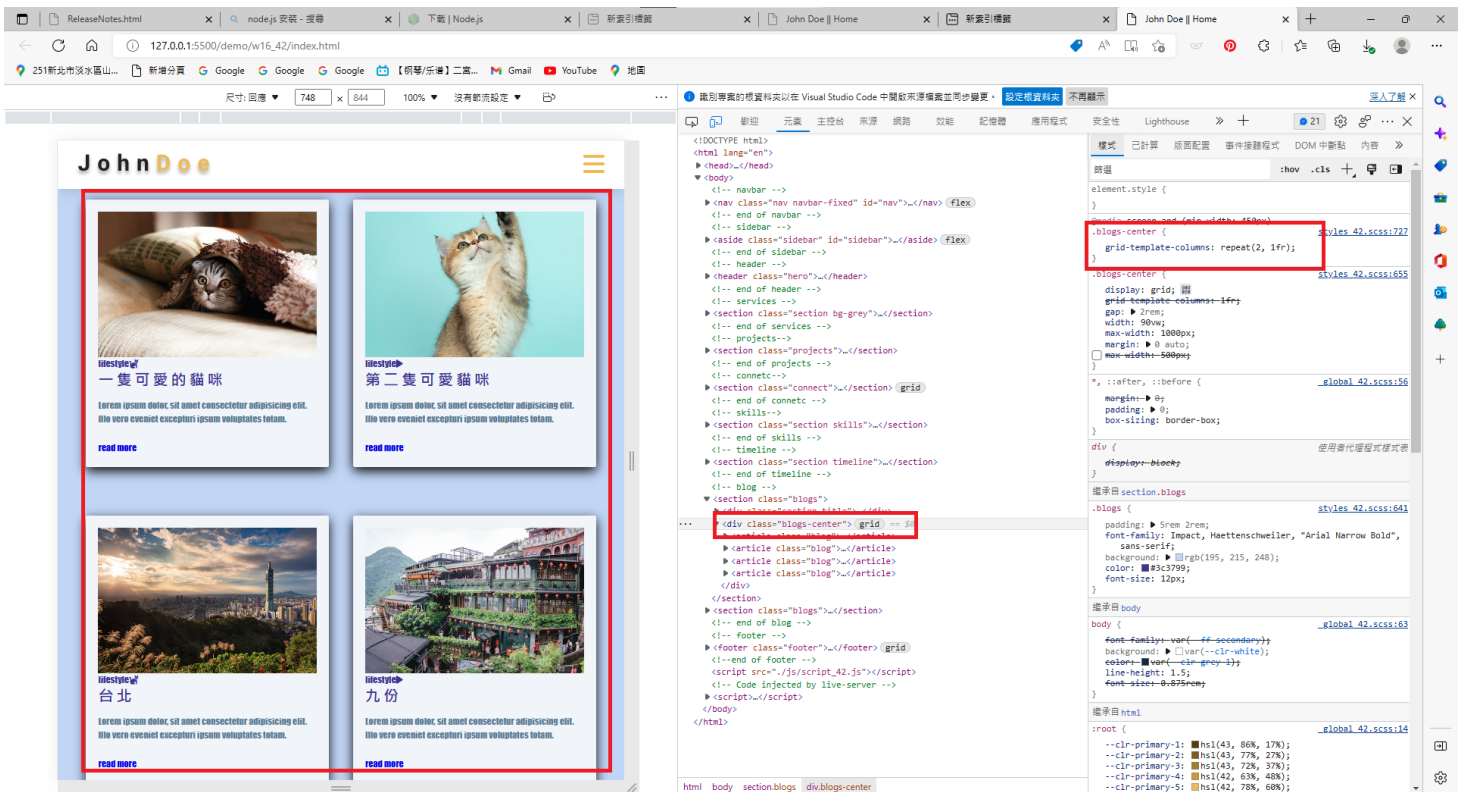

index.html (lines 391-456):

```
<!-- blog -->
<section class="blogs">
  <div class="section-title">...
</div>
<div class="blogs-center">
  <article class="blog">...
</article>
  <article class="blog">...
</article>
  <article class="blog">...
</article>
  <article class="blog">...
</article>
</div>
</section>
<!-- end of timeline -->
```

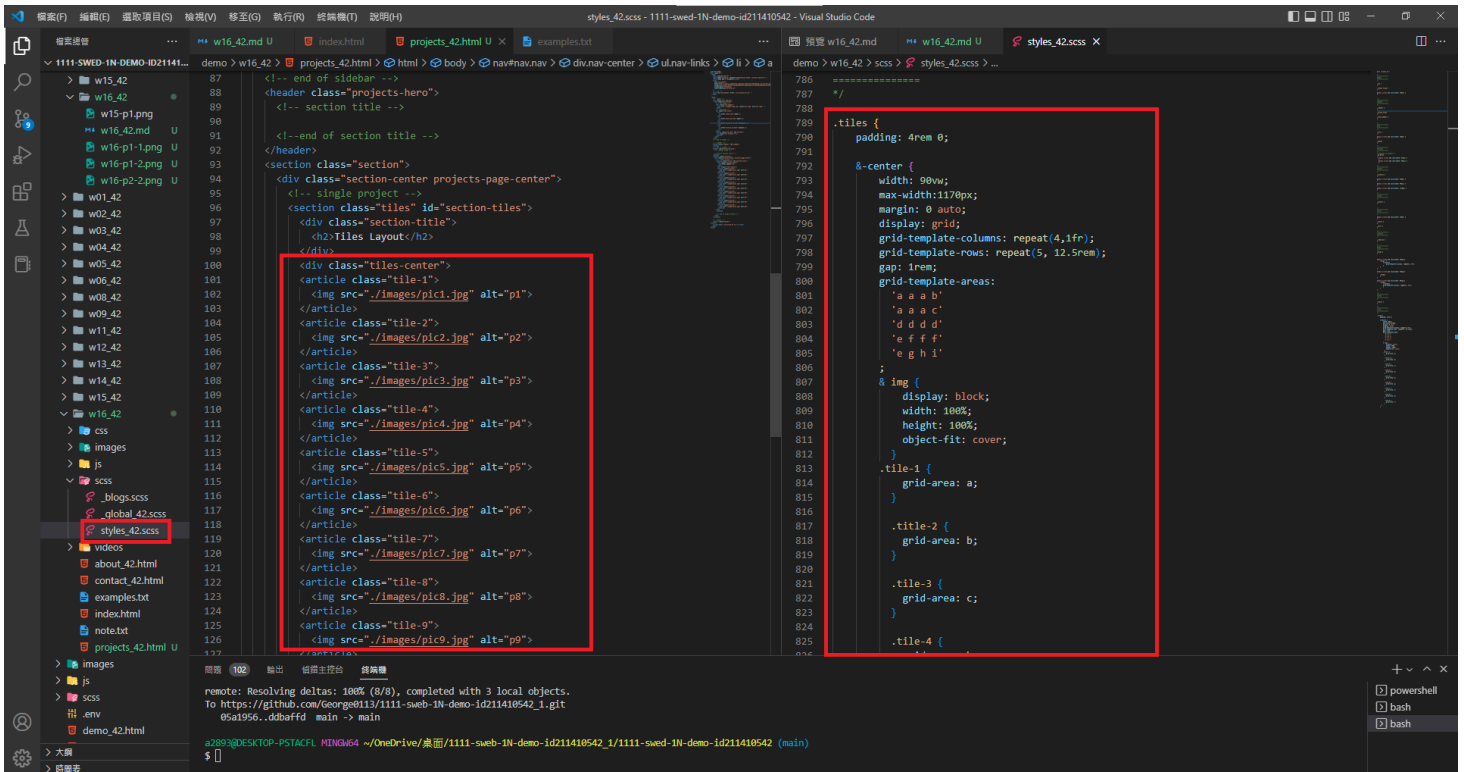

styles_42.scss (lines 721-744):

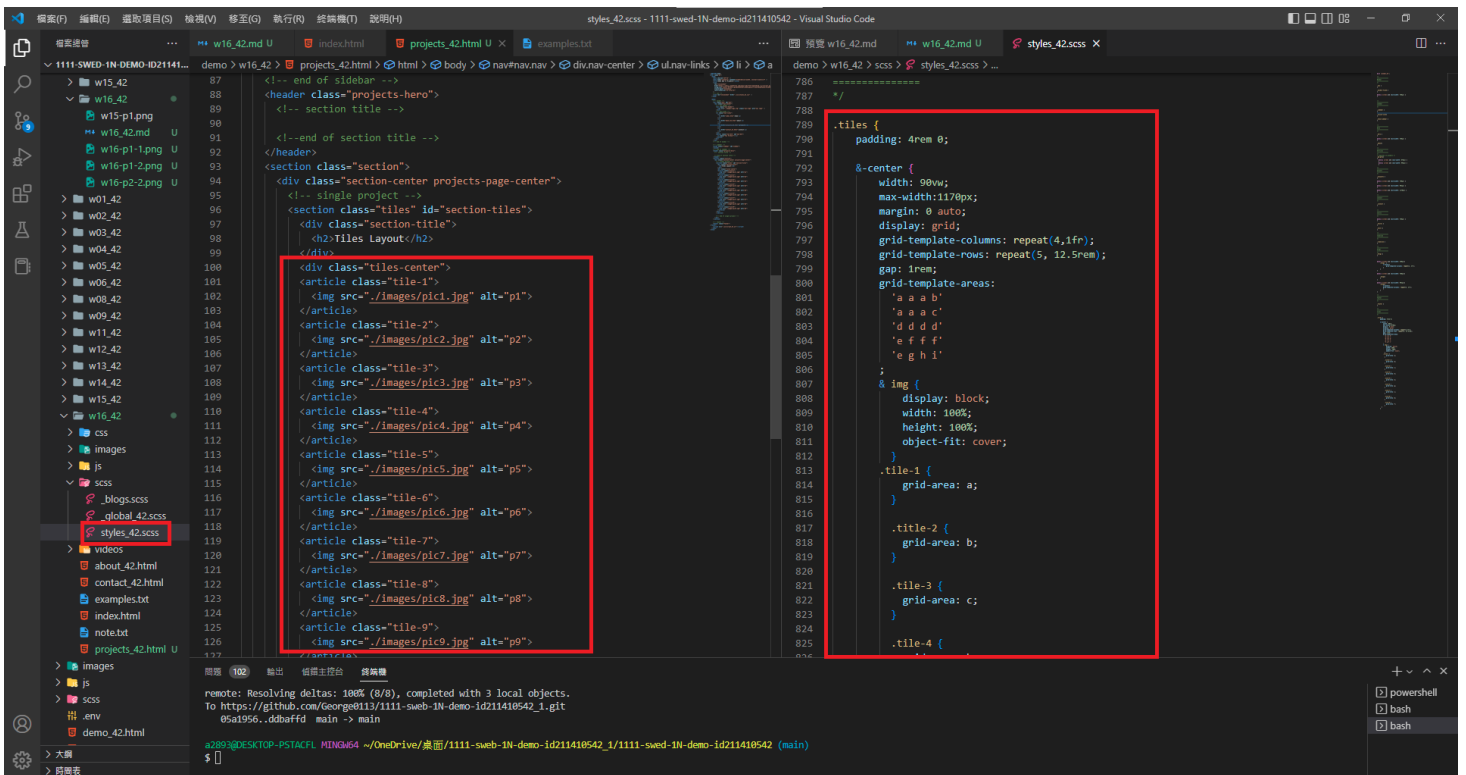

```
.blogs {
  &-center {
    grid-template-columns: repeat(2, 1fr);
  }
}

@media screen and (min-width: 768px) {
  .blogs {
    &-center {
      grid-template-columns: repeat(4, 1fr);
    }
  }
}
```

W16-P2: add w8 section-tiles-layout to project_xx.html

```
$ git log --pretty=format:"%h%x09%an%x09%ad%x09%s" --after="2022-12-21"
```

```
6524ae9 George0113 Thu Dec 22 23:31:46 2022 +0800 add w8 section-tiles-laytout to project_xx.html
```

```
